Eliot School Youth Vacation Programs: Health Safety Agreement

All students and families enrolled in an Eliot School Youth Vacation Program must abide by this agreement as a condition for participating in the program.

MEDICATION: Program Staff may administer prescription and over the counter medication. All medication must be stored in its original container with the label attached, clearly labeled with the medication name and strength, child's first and last name, expiration date, and instructions.

Below is a list of symptoms that preclude children from participating in Eliot School programming, as well as the conditions that must be fulfilled for them to return.

FEVER: Children may not participate in Eliot School programming with a temperature above 100.4 degrees. They must be free of fever for at least 24 hours without the use of fever reducing medication before returning to the Schoolhouse.

RASH: Children exhibiting a rash other than a common skin irritation may not participate in Eliot School programming. Families must provide a written doctor's note with a non-contagious diagnosis to return to the Schoolhouse.

CONJUNCTIVITIS (PINK EYE): Children with an unusual amount of eye discharge or irritation may not participate in Eliot School programming. Families must provide a written doctor's note with a diagnosis to return to the Schoolhouse. In instances of BACTERIAL CONJUNCTIVITIS, children must receive at least 24 hours of treatment before returning. In instances of VIRAL CONJUNCTIVITIS, your child may return once there is no discharge. If the diagnosis is not conjunctivitis, the doctor's note must indicate whether the condition is contagious.

THICK WHITE, GREEN OR YELLOW DISCHARGE: Children exhibiting any thick white, green or yellow discharge may not participate in Eliot School programming. Families must provide a written doctor's note with a non-contagious diagnosis to return to the Schoolhouse.

DIARRHEA: Children with two or more loose bowel movements in one day may not participate in Eliot School programming. Children must be symptom free for 24 hours with at least one regular bowel movement before returning to the Schoolhouse.

VOMITING: Children may not participate in Eliot School programming if they vomit. Before returning to the schoolhouse, children must symptom free with no vomiting for 24 hours.

PERSISTENT HACKING COUGH: Children with a persistent hacking cough may not participate in Eliot School programming. Families must provide a written doctor's note with a non-contagious diagnosis to return to the Schoolhouse.

LICE: Children with lice may not participate in Eliot School programming. Before returning to the Schoolhouse, they must have received treatment at least 24 hours prior and be nit free.

COVID-19: A child with a positive COVID-19 diagnosis may not participate in Eliot School programming for a minimum of five days after their first positive test. After five days, they should test again. If the second test is negative and the child can reliably wear a well-fitting mask, they may return to program on the sixth day after their initial test. If the test is positive or they cannot reliably wear a well-fitting mask, they may not return to the Schoolhouse until ten days has passed since their initial positive test.
